

Pol Rovira Aguilar

Multidisciplinary Game Developer

Vic, Catalonia, Spain | +34 639 740 992 | proviraguilar@gmail.com | Portfolio | GitHub | LinkedIn

I design systems, stories and interactive worlds. Game developer combining gameplay programming, systems design and visual production across Unity/C#, interactive products and original art. Focused on readable state, responsive feedback, narrative mechanics and taking projects from concept to polished implementation.

PROFESSIONAL EXPERIENCE

Game & Web Developer

UManresa | Manresa, Spain | Oct 2019 - Present

- Design and develop interactive educational experiences and gamified systems using Unity/C# and web technologies.
- Lead prototyping and iteration for projects including Management Colors, translating learning objectives into mechanics, interfaces and feedback loops.
- Build modular systems and web interfaces for university learning contexts, refining functionality through educator and stakeholder feedback.
- Collaborate with educators, developers and instructional designers to balance clarity, cognitive load and playability.

SELECTED WORK

Shotgun Battle Grid

Unity 6000.0.65f1 · C# · Solo personal project · 2 weeks · 2026

- Designed and built a complete tactical combat prototype with grid movement, simultaneous action resolution, enemy AI, shields, projectile clashes, health, ammunition and restart flow.
- Created the programming, game design, pixel art, shaders, UI, animation, audio integration and layered feedback system.

SOMA

Unity · C# · Solo project · Narrative action platformer

- Built a 2D cyberpunk prototype combining branching dialogue, boss encounters, scripted scenes and environmental atmosphere.
- Connected combat, player choice, animation, audio and scene transitions into one coherent playable experience.

Bookverse

React · Konva · JavaScript · Solo personal product · 2026

- Developed a desktop workspace that organises universes, sagas and books through a zoomable canvas, contextual editor and reading timeline.
- Implemented hierarchical state, local persistence, import/export and high-frequency canvas interaction.

ADDITIONAL PROJECTS

Power App

Vanilla JavaScript · PWA · Product design · 2026

- Replaced a large powerlifting spreadsheet with an installable mobile-first workflow for training plans, completion tracking and actual results.
- Implemented editable programme data, LocalStorage persistence, light/dark themes and service-worker-based PWA behaviour.

Weekly Meal Planner

React · TypeScript · Firebase · Responsive PWA · 2026

- Created a shared household planner with reusable menus, fourteen weekly meal slots and a synchronised shopping list.
- Structured typed React components around real-time Firestore services, responsive layouts and privacy-aware deployment decisions.

Sentient

Aseprite · Pixel art and animation · Game in development

- Developing the visual language for an original retro-futuristic game through player units, enemies, NPCs and production-ready sprite animation.
- Current public presentation focuses on visual development while gameplay remains in progress.

EDUCATION

Master's Degree in Video Game Design and Programming

Universitat Oberta de Catalunya | 2024 - Present

Bachelor's Degree in Multimedia, Applications and Video Games

University of Vic - Central University of Catalonia (UVic-UCC) | 2017 - 2021

SKILLS

GAMEPLAY & SYSTEMS

Unity 6, C#, gameplay systems, state machines, AI, UI, animation, game feel, rapid prototyping

VISUAL PRODUCTION

Aseprite, pixel art, shaders, 2D animation, Blender, Blockbench, Photoshop, Illustrator

WEB & PRODUCTS

JavaScript, TypeScript, React, Firebase, HTML/CSS, Konva, LocalStorage, PWA delivery

WORKFLOW

Git, GitHub, Visual Studio, Figma, documentation, stakeholder feedback, cross-functional collaboration
